Preschool Program

The preschool program is designed to stimulate young children's active imagination and natural curiosity for learning. Fun, creative learning experiences foster a pure enjoyment of learning. Your child will experience emergent literacy, science, and math activities on a daily basis while exploring their environment. We work closely with local schools to ensure your child's smooth, successful transition there. Teachers keep a portfolio based record of each child's progress that is relevant to your child.

Parents as Partners

The parent/teacher relationship is essential in creating the best possible experience for the child. We take great care in gathering information regarding the child, in order to meet their needs. In turn, we communicate details about daily activities that involve your child.
